COLEMAN-MACH INTERNATIONAL MACH 3 PLUS AND ROUGHNECK REPLACEMENT

The current Mach 3 Plus (8373D896) and Mach 3 Plus Roughneck (8473D896) have been replaced by a single Mach 10 Export Roughneck (45303-8665).

This new Mach 10 Export Roughneck 45303-8665 has been designed, tested and manufactured to the same specification as the previous Mach 3 Plus Roughneck (8473D896).

This new Mach 10 delivers the same cooling power for less amperage, 2 inches (51mm) shorter, less total weight, and same length/width footprint.
